- About Us

Home

The Home page is the main page of the site, from which you can easily access all other sections. Here you will find the language switch button and the login section, as well as an introduction to the game and external links.

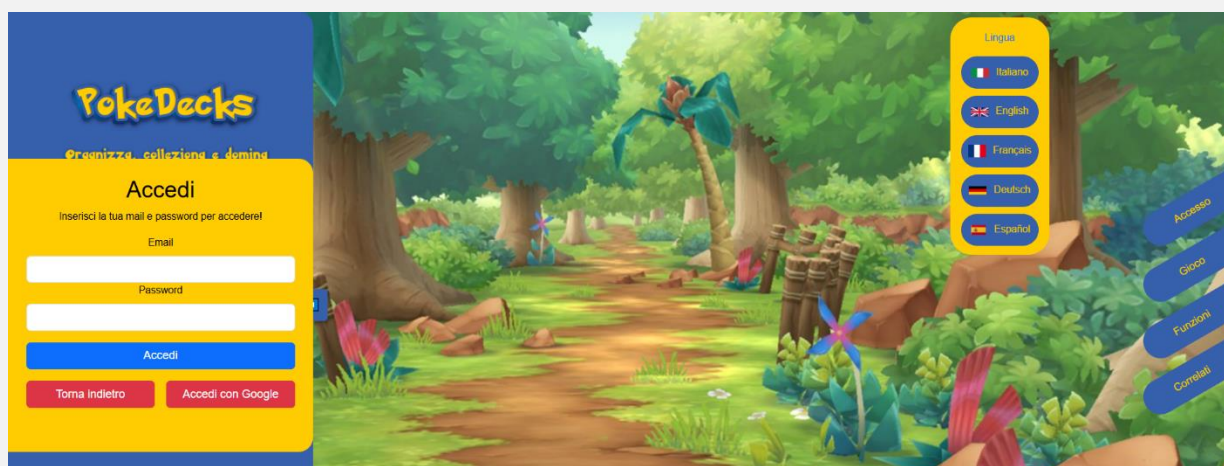

Language

The Language section allows you to change the site interface language. At the top of the page, you'll find a dropdown menu that lets you select a language from Italian, English, Spanish, French and German. After choosing a language, the entire browsing experience will be displayed in the chosen language. This button is available on every page of the site.

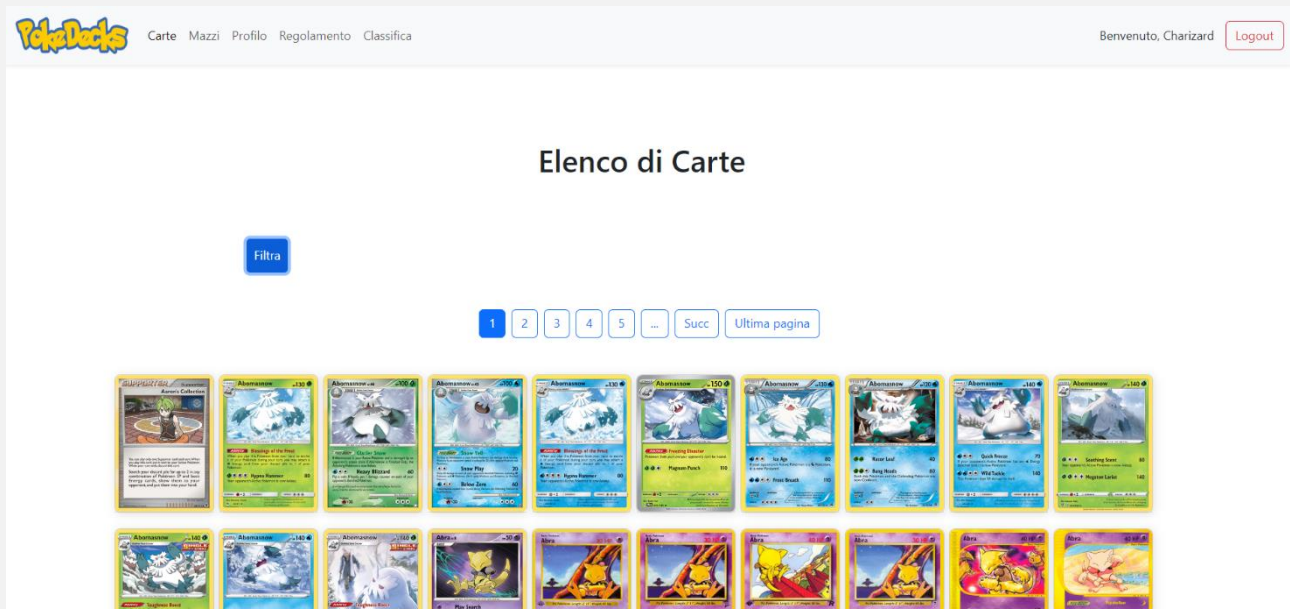

Login and Registration

To access the site and use all features, you must log in. You can create a new account by clicking "Sign Up" and entering a valid email and password; alternatively, you can log in with Google. After logging in, you'll be able to create and manage your card decks, view your collection, and participate in rankings. If you try to access these features without being logged in, you will be redirected to the login page.

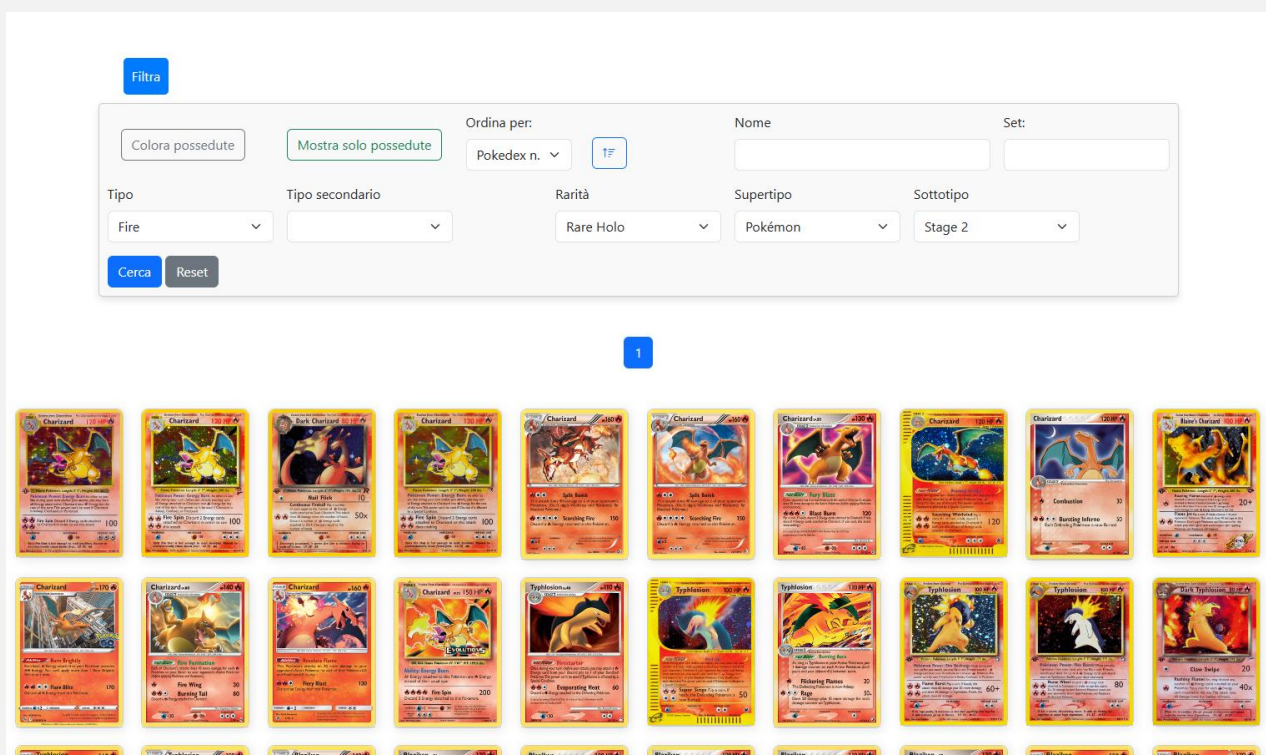

Cards

In the Cards section, you can explore and search for all Pokémon cards available on the site. Each card comes with specific details such as name, type, power, and abilities. You can filter cards based on various criteria, such as Pokémon type, set, or rarity level.

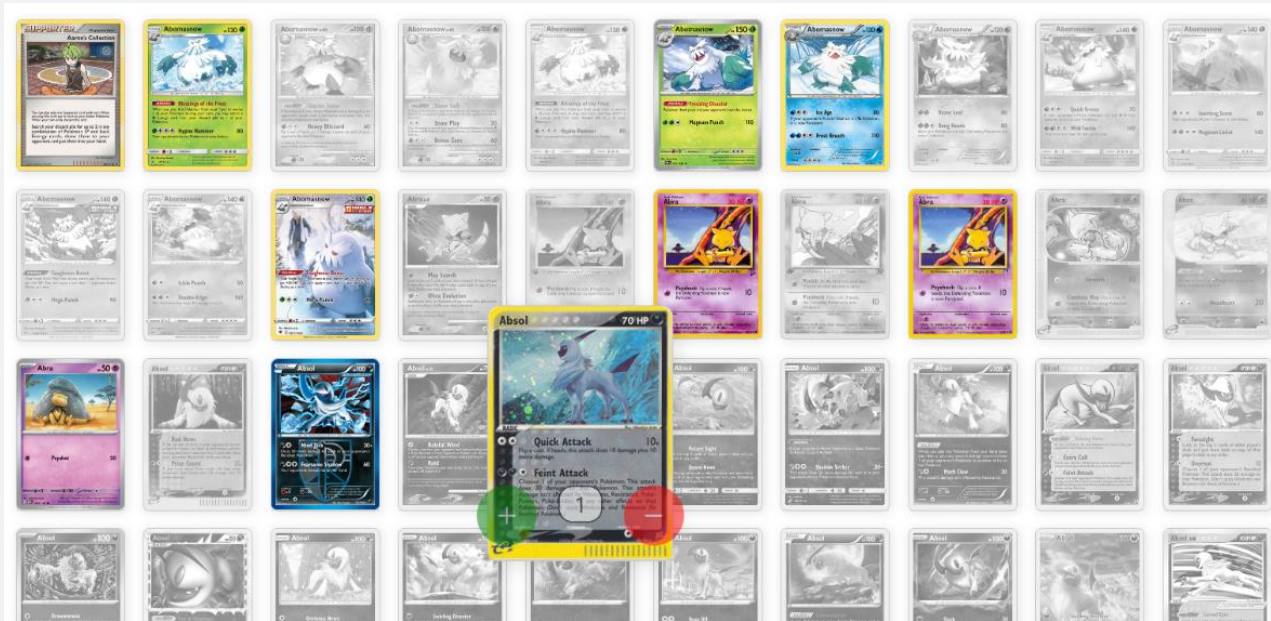

Pressing the “Filter” button allows you to choose whether to view only cards you own, sort them by Pokedex number or level, search for cards with a specific name or set, or search for Pokémon of a specific type (e.g., fire), rarity, or specify the supertype and subtype.

Collection

This page also lets you add cards to your collection. Hover over a card to see how many copies you own; press “+” to add one, “-” to remove one, or click directly on the card to adjust the quantity as desired. Selecting the “Owned” filter allows you to see only the cards in your collection. Selecting “Colour Owned Cards” will display only owned cards in colour, while the rest appear in grayscale.

Card Details

Clicking on a card opens the details page, where you can view the image and all of the card's features.

Informazioni Generali

Nome: Absol

Serie: Black & White

Editore: TPCI

Generazione: Fifth

Data di Rilascio: 05/08/2013

Artista: 5ban Graphics

Numero di Set: 67

HP: 100

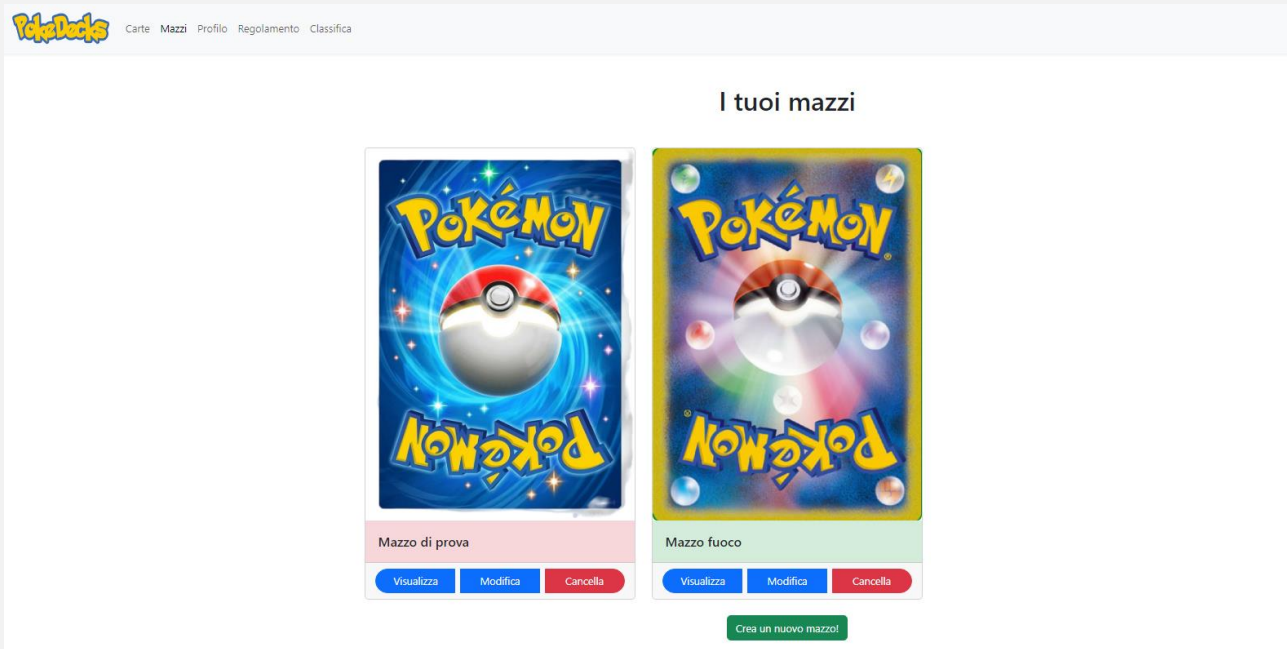

Rarità: Rare Holo

Flavor Text: It appears from deep in the mountains to warn people about upcoming disasters it has sensed with its horn.

Nella tua collezione: 0

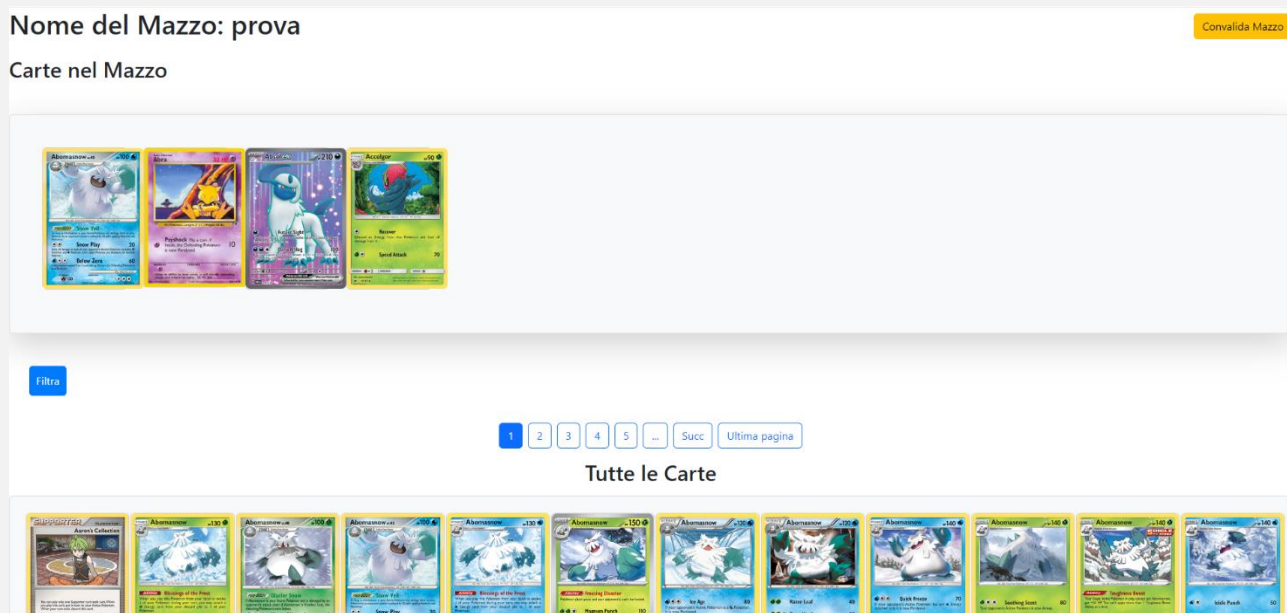

Decks

The Decks section allows you to create, manage, and customize your Pokémon card decks. The main page displays your existing decks, highlighting invalid ones in red and valid ones in green according to TCG rules.

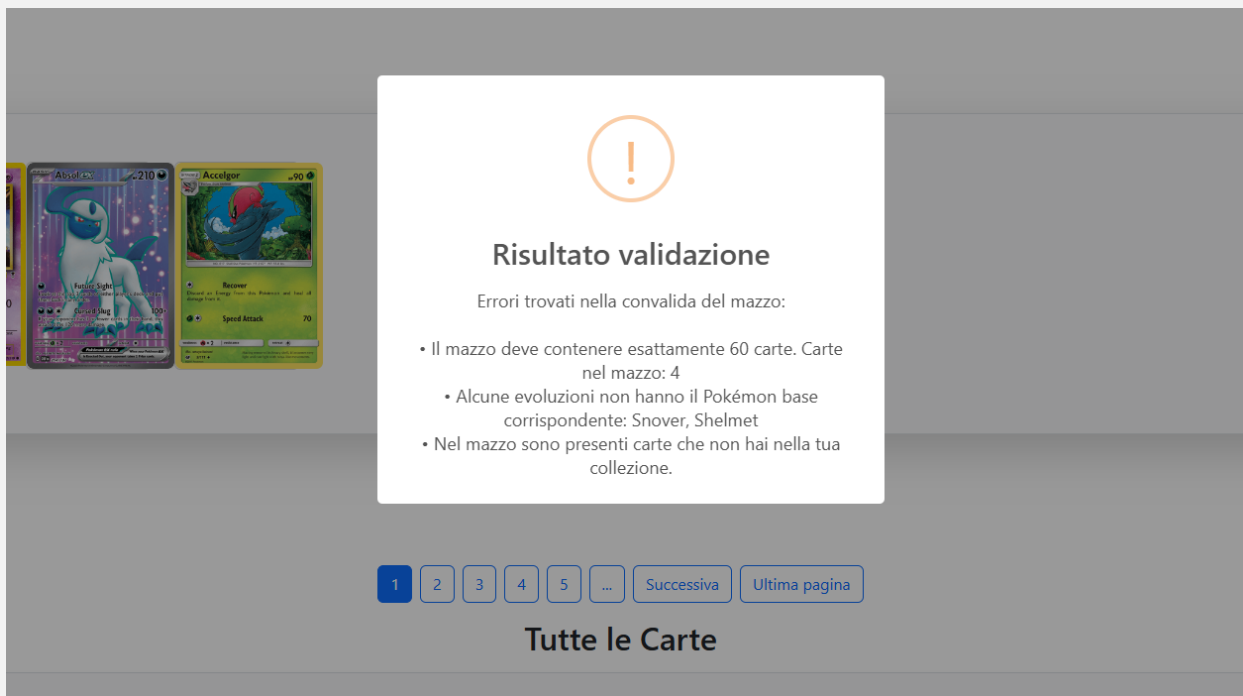

View Deck

From here, you can view the deck's contents and add or remove cards with a simple click. Each change is saved in real time, allowing you to pause deck creation and resume whenever you like.

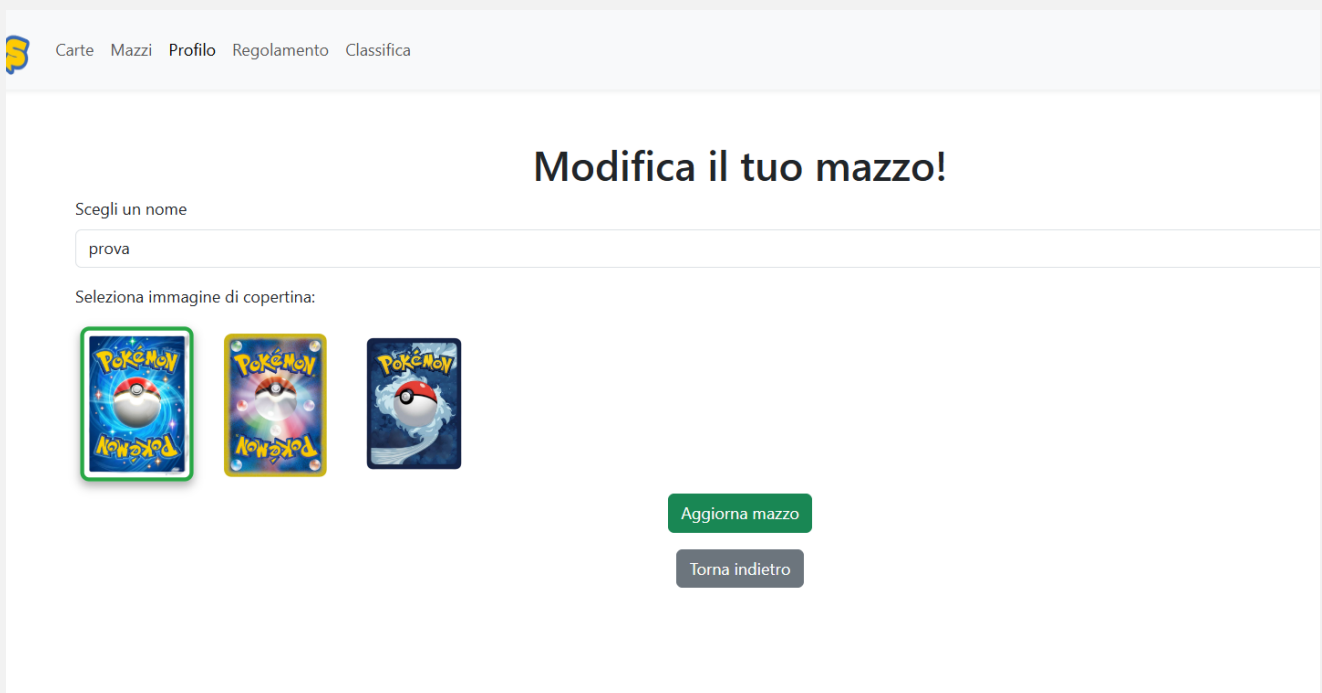

Deck Validation

You can check that the deck meets the official rule requirements by pressing the “Validate Deck” button at the top right of the page. You can validate your deck at any point during its creation and receive feedback on it. For more information, see Rules.

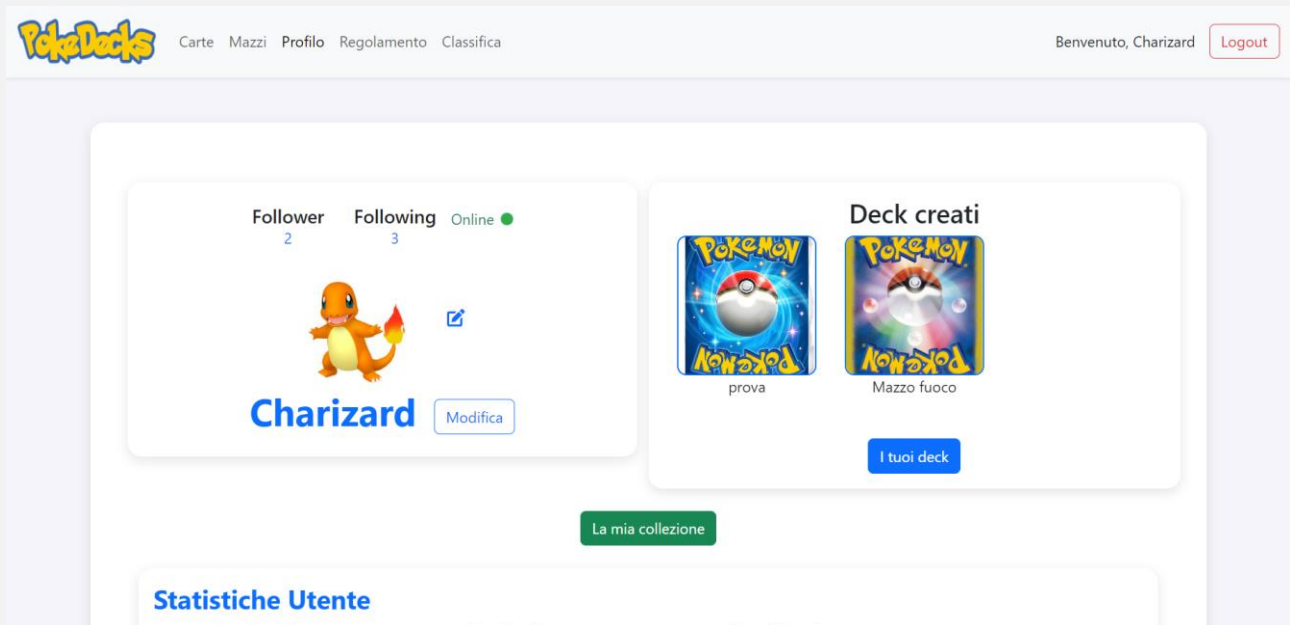

Customization

When creating a new deck, you will be prompted to choose a name and cover for the cards. You can modify these details at any time.

Profile

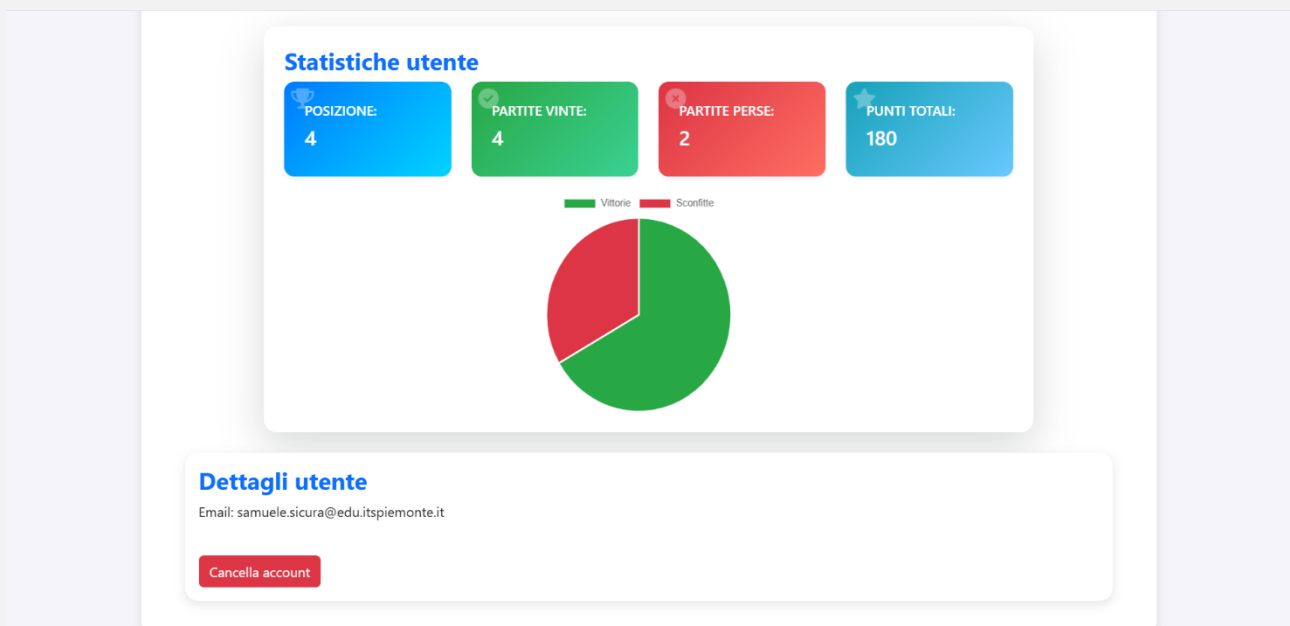

In the Profile section, you can view and edit the personal information associated with your account. Here, you can change your avatar, see the decks you've created, and the number of users you follow and who follow you. You can also access your collection by pressing the corresponding button.

Statistics

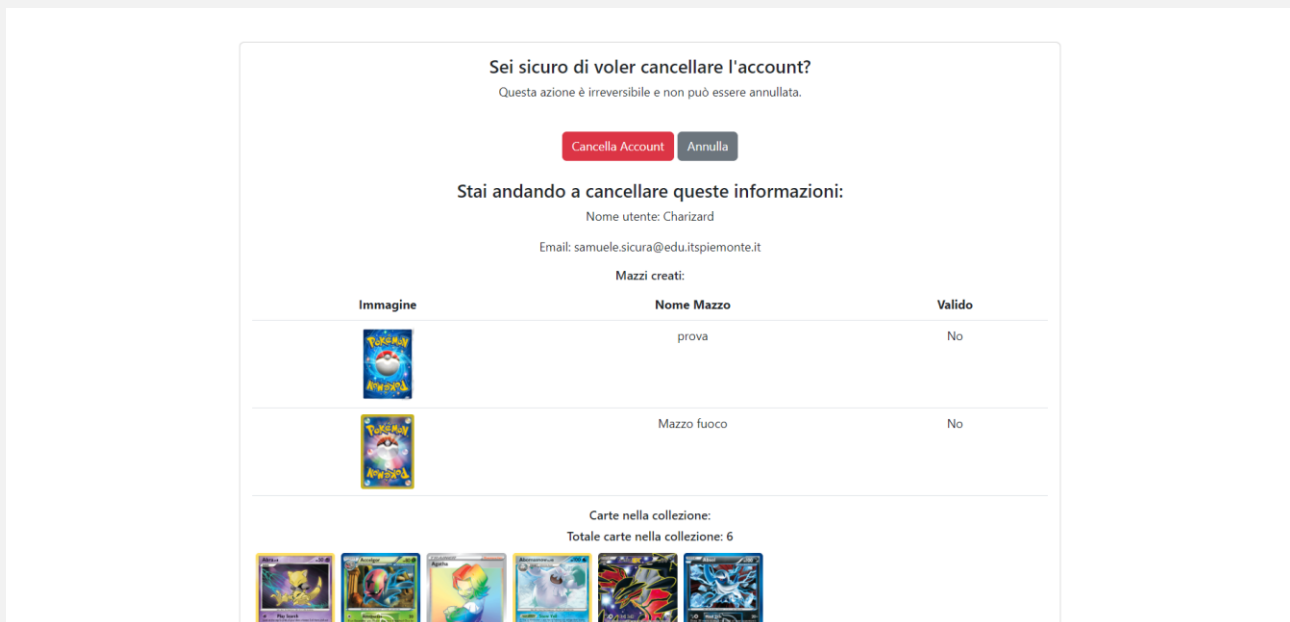

On the profile page, scroll down to view your statistics: ranking position, number of wins, losses, and points earned.

For more information, see Admin.

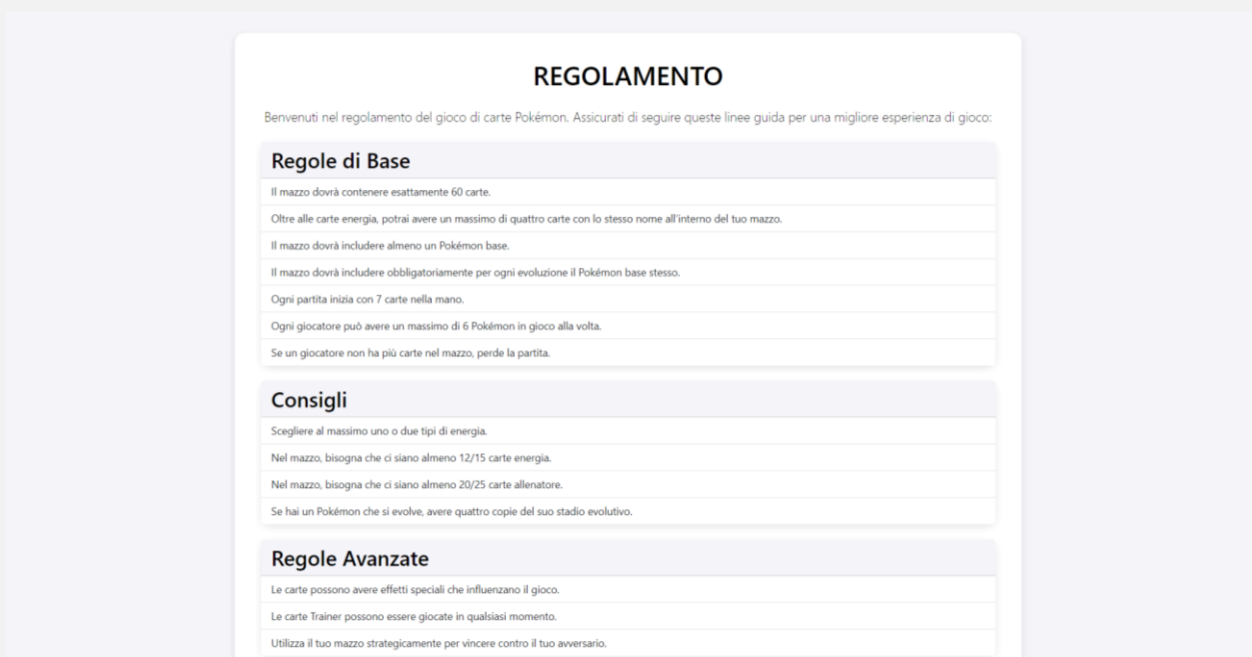

Delete Account

The button at the bottom of the profile page allows you to delete your profile and all related data. This action is irreversible, so think carefully! Before confirming, you will be shown your collection and decks so that you know what you are about to delete.

Rules

This page contains the game's Rules, including the official deck-building rules. In this section, you'll also find tips on building an effective deck for a more balanced gameplay experience.

Ranking

The Ranking page shows the leaderboard of the site's top players, based on performance in battles and competitions. Here you can see your position relative to other users, scores, and detailed stats. There are various rankings available, such as weekly, monthly, or global, allowing you to track progress and compete with other players.

Admin

Some users will have the role of administrator. If you are an Admin user, you will have access, in addition to the pages already mentioned, to the Statistics page. Here you can modify the number of wins and losses for each user. Access to this page is intended for a user acting as a referee in the actual game.

About us

The Infinite Monkey Theorem states that if a monkey types endlessly on a typewriter, it will eventually write the Divine Comedy. We may not be entirely tireless, but we're confident we can meet every request.
